

Introduction to Solid

Presentation Outline

- What exactly is Solid?
- What does Solid look like?
- How is Solid useful for our cohort?
- How do we work with Solid?
- Questions...

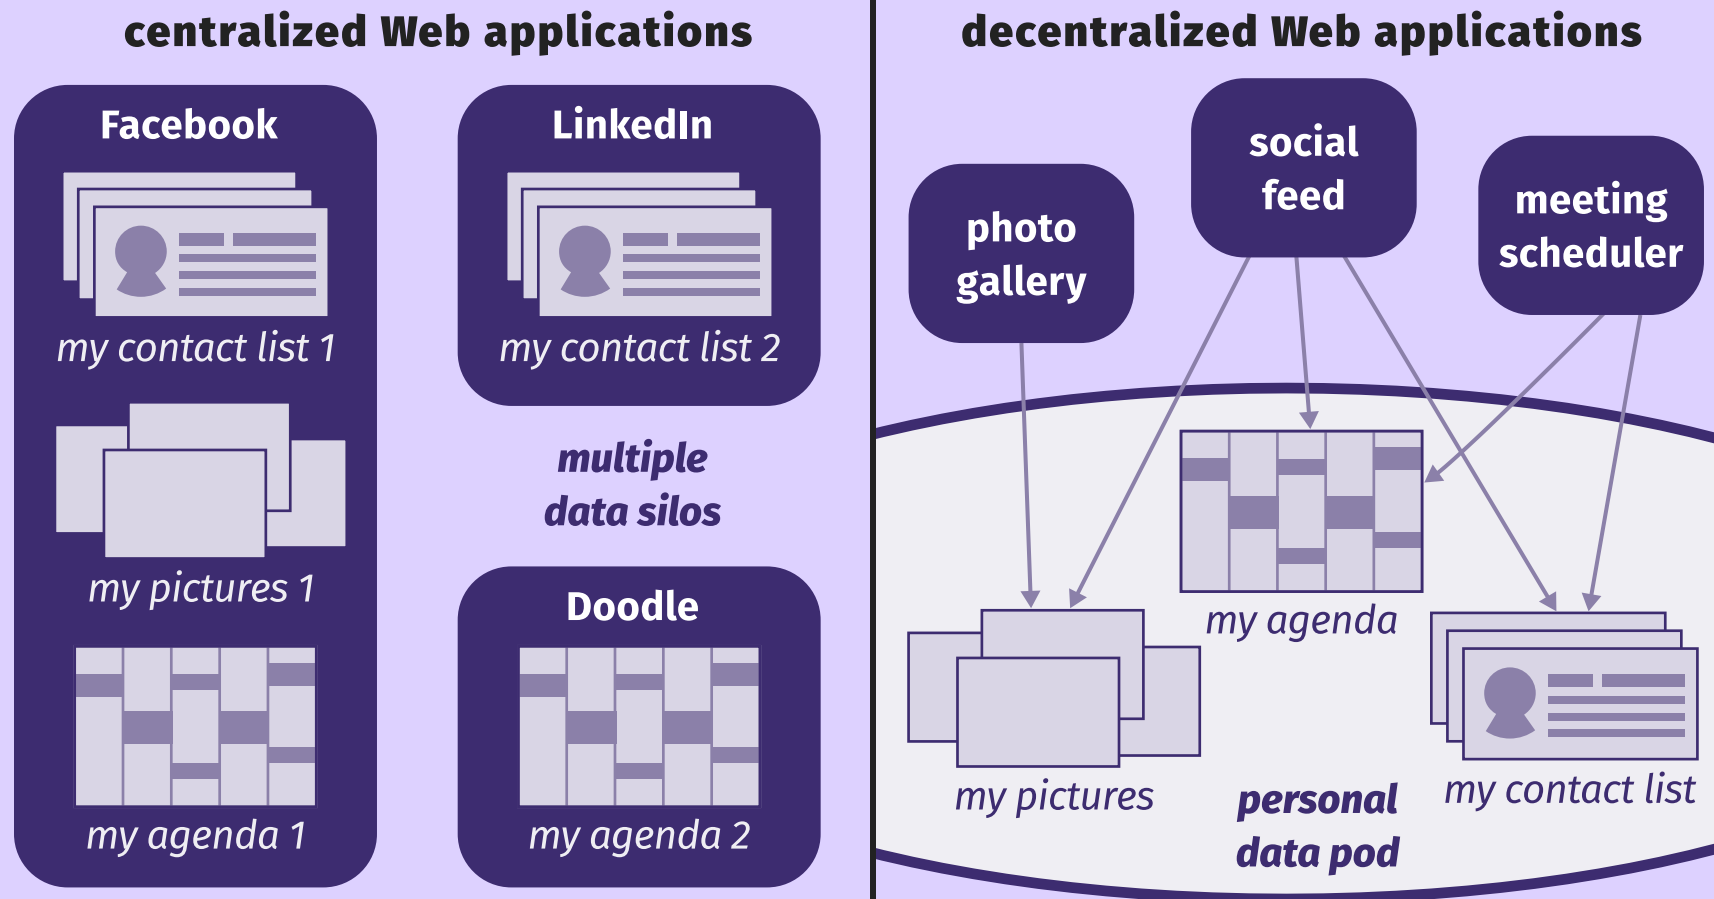

The World Wide Web (W3C)

- A set of specifications
 - Identification
 - Interaction
 - Data formats
 - General architecture
- Content / information sharing over the internet

The issue with this framework

- Applications collect and centrally store personal data

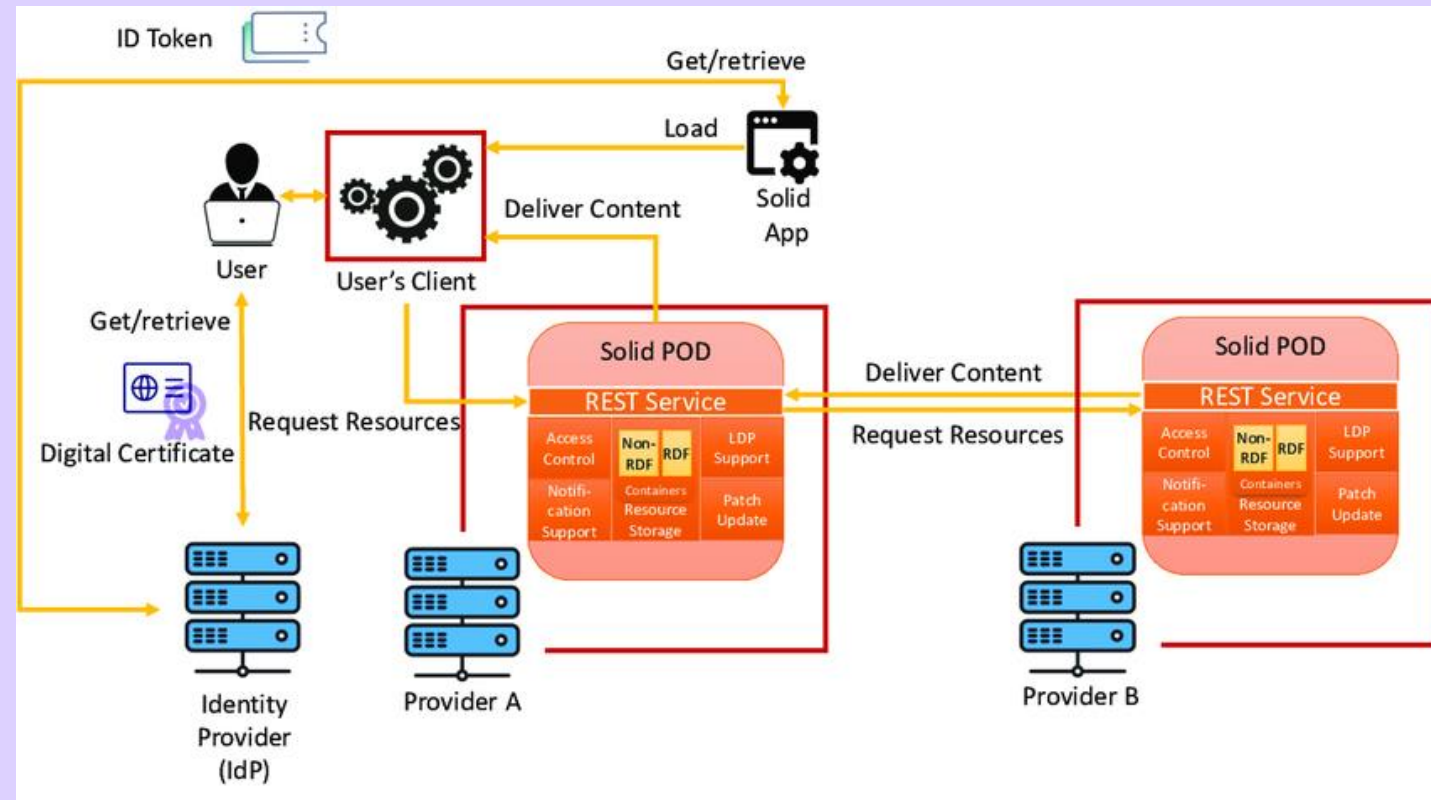

Enter the Solid Specification

Additional resources and specifications that build on those of the W3C spec

Resources for:

- Web communication protocols
- Global identifiers
- Authentication mechanisms
- Data formats and shapes
- Query interfaces

The Solid Architecture

How we aim to use Solid

What the implementation will look like
