

PENGQUIN: PErsoNal Genome QUery IN Healthcare and Clinical Practice

Elias Crum^{1,2}

¹IDLab, Department of Electronics and Information Systems, Ghent University – imec, Belgium
²Flemish institute for Technological Research (VITO) Mol, Belgium

Genome Data for Clinical Care?

Still Many challenges:

- Storage
- Privacy
- Governance
- Formatting

Could Semantic Web technology help?

Personal Genome Sequences

- Variant Call Format (VCF)
- Very large (~GBs for one individual)
- Strict privacy protections

- ### Research Challenges

 - Privacy granularity
 - ↳ Index privacy concerns?
 - ↳ How granular is adequate?
 - RDF Conversion + Data Linkages
 - ↳ VCF to RDF Conversion?
 - ↳ What data should be linked?
 - ↳ Automation of data linking?
 - Querying performance
 - ↳ Many, large data sources
 - ↳ Algorithms that use indexes?

- ### Engineering Tasks

 - Genomic data storage in Solid pods
 - Data privacy management
 - Data access via the web

- ### Research Pursuits

 - Represent genomic data as RDF?
 - Linking genomic and health data?
 - Single and Many pod Querying?
